

## Memorandum of Understanding

Collection,  
Production, and  
Sharing of  
Geospatial Data

## Objectives

- To provide for the exchange of data
- Operating efficiency and cost savings
- Avoid duplication of efforts
- Support the NSDI and ISDI
- Develop and implement statewide standards to better support business practices and assure accuracy and consistency of data

## Benefits

- Reduce redundancy
- Vehicle for development and distribution
- Available to general public
- Promotes development of partnerships and fosters collaboration

## Data Sets (*includes but not limited to*)

- |                        |                               |
|------------------------|-------------------------------|
| • Ownership            | • Climate                     |
| • US Census / TIGER    | • Land Use                    |
| • Elevation (NED)      | • Soils                       |
| • Transportation       | • Cadastral Reference Systems |
| • Hydrography          | • Ortho-imagery               |
| • Political Boundaries | • Wetlands                    |
| • Land Cover           |                               |
| • Geology              |                               |

## Terms of Agreement

- Non-binding
- Not a substitute for any statutory, regulatory or policy obligation
- Propose changes to the MOU
- Withdraw from the MOU
